The second is easier
Although it may be breezier
And the snow is falling down
As the fire smoulders
I never grow older
Never grow older no no

Because i drink from waterfalls
The stars above shine on me
I beckon them to fall on me

BV:
Lets walk to a place where life would have no end

I'm ready to come back to you because
There's no use in feeling in feeling
All the things i'm feeling
When there's no one to feel with me
