I've been thinking

Since we're talking

The situations bugging me, I'm reminiscing

Confusion's cruising

Teasing can be pleasing when you're in control

But there're things to be done before we can love on

Chorus

Believers believe in me, in my vibe

My heart's occupied

Believers believe in me, in my vibe

My heart's occupied

Hey baby I can't sleep till the sunset rises

Tranquillity is gliding

I am satisfied with vocalising rushing me

You don't understand that you're flushing me

This is not a faze that's gonna fade away

Chemistry that's compounding will be there
surrounding

Chorus

Taking out time to let you know there's no game sugar
cane

I'll keep my inspiration burning everyday

Chemistry is around, oh-oh
Hear me, baby, that believers believe in me
Try to relate I must create
In my vibe
Believers believe in me
Believing in me believe in me, believe in me
Yeah-yeah
I'm gonna be where I wanna be
No action or distraction
Yeah break or make
I'll follow faith
Reviving, I'm vibing
Yeah smiling
Believing, believing
I'm gonna be where I wanna be
Believers believing in me.
