"Stay With Me"

Visit "[Stay With Me](#)" on MotoLyrics.com

Tell me that you love me
Tell me that you need me
Tell me that you stay with me
Show me all your secrets
Show me all your love
Show me that you feel the heat
Stay with me
And feel the heat of the night
And let us fly away
Tell me that you love me
Tell me that you need me
Tell me that you stay with me
Stay with me

The time is now to bring your friends along
We're coming on and we're coming on strong
Music is a key you want more follow me, follow me
Take your time 'till one aim came one
Love is calm down and flow in my mind
Being over things to be
I've got what you need to make you right
What you need to do it all impossible
Is it origin I don't know ...
Passion we're waiting
Or another bod' to break again
What a room what a fact
See you on the next track
What you need to make you right
What you need to do it all impossible
Is it origin I don't know ...
Passion we're waiting
Or another bod' to break again
What a room what a fact
