I tried to step inside the past and  
Search for hidden moments of your history  
I look inside your hour glass  
Time eradicating memories swiftly  
You know you were my best read  
A simple story elegantly told  
The chorus to my melody  
You sing and all my harmonies unfold

Gone for too long  
Those days won't come back to me  
Gone for too long  
Those days won't come back to me

Stare into that inner place  
And try to comprehend a reason for this  
Dreams dissolve without a trace  
I know I must move on, but I can't forget

Gone for too long  
Those days won't come back to me  
Gone for too long  
Those days won't come back to me
