She said she never knew how much she needed me
before
I left her there, but I never left her there
One more black-out and she might be out for the rest
of her life now
If I left her there, but I never left her there
And she strolls in to the party
Drinks, vomits, and falls asleep
After she, makes out with everyone but me
This is more than I can stand to bear
As she falls out of my reach, I realize I just don't care

She gets bored with me

So she starts a fight, cause god forbid we can go a
night
Without breaking things, and making a fucking scene
I'd love to show her the way to the door but she's half
out the window
Should have let her go, but I couldn't let her go
We both know she's insecure
But the bullshit she makes me endure, is so absurd, I
think that I'm on my last nerve
This is the last time I'll clean your mess
I'm no goddamn janitor, and I'm no psychiatrist

She gets bored with me

She said she never knew how much she hated me
before
I left her there, but I never left her there
And she said she don't need me
So I just left her there, fuck it I left her there

She gets bored with me
