Last, but not least  
Infect the children  
The seeds of today  
Are the embers of tomorrow

Painted on the walls by lepers  
The prophecies of death  
Death beyond human understanding  
This disease was only the beginning of woe

"I'll make you wish you were not human"

When our religious immunities betrayed us  
We turned to machines

The cold infrastructure  
Born without witness, devoid of intelligence  
The curse of God

"I will repair you with my love,  
I will repair you with my humanity..."

The seed of today  
Is the death of tomorrow
