Shimala luga la  
Theyre here from outer space  
Shimala luga la  
I saw the signs of something  
moving through the sky with speed  
I stopped explored around  
it landed in the cottonfield  
they dimmed the lights right down  
a man walked out  
I heard a ray soundreflecting  
in my mind his code was clear  
I felt the signs  
Must have been the signs from another star  
oh oh my destination  
oh yeah could it be  
Im from another star  
oh oh youre from the place  
I know I miss in me

10.000 light years away  
reading the code signs  
and see how they pray  
from 10.000 years away  
youre the gods from outer space  
10.000 light years away  
reading the code signs  
and see how they pray  
from 10.000 years away  
youre the gods from outer space  
Shimala luga la (repeat)

They took me back in time  
I found were from another kind  
long ago and far away  
another place we used to stay  
they saved the human race  
from enemies from outer space zone  
our star was blown away  
and now thats all is left is hell  
Now I know that we are not alone  
oh oh communication  
oh yeah now I know Im from another star

oh oh youre from the place  
I know I miss in me

Chorus repeat

The question on whether or not its possible theres life  
from another planet  
has finally been answered

Chorus repeat  
Shimala luga la  
Shimala luga la  
Shimala luga la
