Come make we go
Come make we go
Come make we go
Make we go home

This land is so cold
so come make we leave out of rome
This land is so cold
so come make we leave Babylon
come make we go home
Come and make we go home

I ask:
How you wanna see when the sun never shines
when sinister clouds cover the sky
Tell me, how you wanna feel when your senses get
deaden
by the things that you eat
and the things you take in
but this system will burn down
too long satan is wearing the crown
This system will burn down
so my brethrens come make we move out
And make we go

Come make we go
Come make we go
Make we go home

This land is so cold
so come make we leave Babylon
This land is so cold
so come make we leave out of rome
Come make we go home
Come make we go home
Come make we go home

I ask:
How do you want to live with an enslaved soul
and illouision as your goal
and under satan's control
Tell me, how do you want to love

when your heart must be closed
and if you opened the door that would be too
dangerous

No matter who you are
and no matter how clever you are
You can't resist forever
So my brothers and sisters come on
and make we go

Come make we go
Come make we go
make we go home

This land is so cold
so come make we leave Babylon
This land is so cold
so come make we leave out of rome

Come make we go
Come make we go
Make we go home

This land is so cold
so come make we leave Babylon
This land is so cold
so come make we move out of rome
Come make we go home

Come and make we go home...
