I'm breaking out to the other side  
When the music's loud and it get real high  
Light your flash and be on the floor  
Close your eyes and I'll give you more

Throw your hands up to the sky  
Let the music take you high  
Feel the energy through your soul  
Let the rush take control

From the bottom to the top  
I never never never stop  
Round and round like a merry-go-round  
What goes up must come down

I found romance, I'm in a trance  
I love to dance so take control.  
I love to dance, I'm in a trance  
I found romance to take control.  
Don't stop
