When I see you tonight
Will I hold you in my arms
When I see you tonight
Will you be there with your charms
Don't let me travel all the way
Tell me that it means no harm

Am I still the only one
That you dream of every night
Am I still the only one
Far away and out of sight
Or means your letter in my hand
The beginning of the end

Solo

Never ever did you wrong
Thought of you all day long
Now don't leave me
Don't you grieve me
Don't you need me anymore
Feel like grasping at a straw
Make your mind up, tell me dear
Where's the one that I adore

OH, when I see you...

Don't you know that I've been true
Though the distance made me blue
My heart's yearning
Soul is burning
Did you want me to come back
Just to see a lover's wrack
Or will you hold me then so tight
Make me feel our love's still right

OH, when I see you...
