Chorus :Way up there, where peace remains,  
where silent thunders and angels sing.  
Imagination and amazing grace,  
bring us colser to our home in space.

1st Verse : The stars are gathered and illuminate,  
to lead us safely though heavens gate.  
We look behind us at the wonder of the earth,  
only to remind us where God came from.

Chorus :Way up there, where peace remains,  
where silent thunders and angels sing.  
Imagination and amazing grace,  
bring us colser to our home in space.

2nd Verse : Like a shooting star, through endless time.  
We say a prayer for all mankind  
if we could only see through that tiny window,  
we could be reborn and we all would know that way up  
there

Chorus :Way up there, where peace remains,  
where silent thunders and angels sing.  
Imagination and amazing grace,  
bring us colser to our home in space.

Bridge : We are all, we are one  
created with the sun, moon and stars  
every woman, every child and man  
will one day take each others hand.

Chorus:Way up there, where peace remains,  
where silent thunders and angels sing.  
Imagination and amazing grace,  
bring us colser to our home in space
