Lesson 1: Take Care

I know you got to get out of here
Honey don't pass up this chance
For a sweet deadly love romance
Let's be together for a while
And get to know each other well,
Exchanging jokes and tales and chatter
Before we get to the things that matter

Oh darling let me pick your brain out of your skull!
Baby I'm crazy and I wanna make your mind dull!
Hungry for love and your warm pate will feed me
This is sweet sick love lobotomy...

Lesson 2: Yes I know

Love feels good by this afterglow
I pull you close hold you near
Take away all your dread and fear
But I can hardly wait to taste you

In the darkness of the night.
Naked, brainless wrapped and twisted
Oh what a vision of delight

Oh darling let me pick your brain out of your skull!
Baby I'm crazy and I wanna make your mind dull!
Hungry for love and your warm pate will feed me
This is sweet sick love lobotomy...

Release your lust held deep within
I'm ready now, let love begin

Oh darling let me pick your brain out of your skull!
Baby I'm crazy and I wanna make your mind dull!
Hungry for love and your warm pate will feed me
This is sweet sick love lobotomy...
