Another time, another place
We'll be together again
This kiss, this same embrace
Will be more wonderful then

Though goodbye is a sad time
Be glad we had time
To fall in love
I need my love with you

When shadows grow, I'll miss the glow
That only you can provide
But then, I'll just pretend
You're still here at my side

Now give me once more that kiss I adore
Then I'll let you go
But we'll meet another time
Another place, I know

We'll meet again
But now give me once more that kiss I adore
Then I'll let you go just for now
But we'll meet another time
Another place, I know
Another place
