"Heat In The Street"

Visit "[Heat In The Street](#)" on MotoLyrics.com

The pressure's on I feel it
There's heat in the street
So when I'm a dealin'
I gotta be discrete

I'm dreaming of a number
When you hear the sound
You'll know that I'm a feelin'
Feelin' like comin' round

Comin' round to see ya
I couldn't let you down
If I can't go out to see ya
I'll get there underground

You know you got what I want
and I got what you need
We should be keeping ourselves inside
There's heat in the street

The street is paved with fire
I will not get burned
Won't wait to retire
To get what I have earned

Well I'm staying undercover
Til the time to meet
Not today maybe tomorrow
Cause there's heat in the street

I can take it people
Because I've found the shade
I'll travel incognito
That's part of the price I pay

You know you got what I want
and I got what you need
We should be keeping ourselves inside
There's heat in the street

The temperature is climbing

And the air is thick
Can't affect my timing
I'll be movin' quick

I won't be made a fool of
You better take a seat
I'll just have to cool off
Cool off the heat in the street

I'm comin' round to see ya
I know they let you down
If I can't go out to see ya
I'll get there underground

You know you got what I want
and I got what you need
We should be keeping ourselves inside
Forget about the heat in the street
