"Save Me"

Visit ["Save Me"](#) on MotoLyrics.com

Didn't much feel like getting up this morning
Something evil locked my brain
Had that edgy sense of foreboding
And you know it just ain't gone away

Another bad tequila sunrise
And my eyes are just pure fire
I need someone to be blamin'
You know my situation's dire

Someone who will come and save me
Someone could have saved me
Need someone to save me
Save me from myself

Living in a world full of strangers
Who become my best friends at the witchin' hour
And they're makin' all kind of arrangements
Oh but the cream always seems to turn out sour

Need someone who can save me
Need someone to save me
I need someone who could save me
Save me from myself

Deep inside I know I'm a good man
Who maybe's just gone off the rails
And I think what I need's a good woman
To get me back on track, to help me roll again

Need someone who can save me
Need someone who can save me
I need someone to save me
Save me from myself

You gotta help me baby
