"Empty Promises"

Stuck on something that just don't feel right. All
Substance void from your mind. Been used so now you
just
Have to lose and now you've been there for so long
and
You're oh so fucking tired of letting yourself go. Down
Again and again. Time to close up. Cut yourself off
from
The ones who care the most. Empty promises from
empty
People. They don't know what to do. Lies and fears.
Deception and tears. It takes a hold over you. Your
fears
They've got you now. They've got you on the run.
