Let's close our eyes and walk across the sky (x4)

Whatever comes don't lead apart from you
Whatever happens been so close to you
All I dream is to stay and dream
All I want is to say I'm fake
All I need is that you believe
All the rain will fall to the sea

Let's close our eyes and walk across the sky

What will you say as the rain fills up your mind
And whatever you do see that rain fall down
What will you say as the rain fills up your mind
And whatever you do see that rain fall down

The feel of you surrounds me tonight
Like the dawn you bring light to my dark night
All I dream is to stay and dream
All I want is to say I'm fake
All I need is that you to believe
All the rain will fall to the sea

Let's close our eyes and walk across the sky

What will you say as the rain fills up your mind
And whatever you do see that rain fall down
What will you say as the rain fills up your mind
And whatever you do see that rain fall down
