"What's Come Over You"

Visit "[What's Come Over You](#)" on MotoLyrics.com

Something's missing something's wrong
Something's not right where it belongs
Why am I doubting what I thought I knew
What's come over you

Where's the laughter where's that touch
That made me feel you were in love
I pray it's just a phase you're going through
What's come over you

I can roll with the tide come in from the rain
Turn my back to the wind stand my share of pain
But if you don't love me there's nothing I can do
What's come over you

All these memories of all those times
Make it so hard to say good-bye
To all those dreams we shared that won't come true
What's come over you

I can roll with the tide come in from the rain
Turn my back to the wind stand my share of pain
But if you don't love me there's nothing I can do
What's come over you
What's come over you
