Ive hidden in the silence  
Then I took it far away  
I was living in the distance  
In the corners of my day  
You came into my life  
And centered all my fears  
Loving you is everything  
The meaning to these years  
Partners in time  
Partners today  
Walking through problems  
That might have come out way  
Cause when all is said and done  
There's no need for me to run  
Youre the only one  
The only one I love  
We turned over the pages  
And saw the pictures there  
The color might be fading  
But I can see it clear  
You walked into my life  
And balanced every word  
Loving you is everything  
Everything Ive heard  
Partners in time  
Partners today  
Walking through problems  
That might have come our way  
Cause when all is said and done  
Youre the only one I love  
Youre the only one the only one I love  
Once I had a reason  
To run and hide from you  
Hiding in the silence  
Was all I ever used to do  
But now I know the feeling  
Must be al about believing  
Youre the only one  
The only one I love.
