(Vs. 1)

The sky combines with forest trees  
One long and frightening song  
Silence screams til my ears bleed  
One in one million and you are alone

Dreams transform into ghostly mist  
And I have no slept  
For sleep can't exist

(Chorus)

Strange fears grow greater than my own size  
White boxes in my head and in front of my eyes

(Vs. 2)

Windchimes appear all up and arround me  
But they are afraid to sound  
In fear that the wind will come from behind  
And laugh and scornfully cut them down
