I know a girl with a crooked mirror  
She saw her face through the crooked lines  
She said Mother you're my believer  
Can you help me to see me a I really am?  
Help me to see that beauty lies in me  
So be my mirror and I'll see that beauty lies in me  
She said ain't it a mystery that I can believe  
In somebody else's beautiful dreams  
But here in this mirror the image is broken  
I wish I could swallow the love I receive  
'Cause I can't believe that beauty lies in me  
When your mirror's broken it only makes sense  
To rely on opinions from others  
Now this girl was lovely with beautiful features  
But words like these they don't come from your friends  
And her thoughts deceived her so she played follow  
the leader  
And she said be my mirror and I'll see that beauty lies  
in me  
He came along where she was weak he was strong  
He took the mirror and he threw it down and whispered  
Look at me I'll help you see the beauty I believe  
She said be my mirror and I'll see that beauty lies in me  
I know a girl with a beautiful family  
And they're her mirror they shine like love  
She's finding peace as a wife and a mother  
This healing road that she's walking on  
She sees her reflection in her young boys eyes
