Take my advice, free your mind  
Hope the rest of us 'll follow blind  
Improve inside, don't back down  
You're the ruler of your life

When...  
After to many it does good  
If we sink ourselves  
Not to see what's goin' on  
Two wrongs make one right"  
When we hit the blank walls  
Sadly we turn back  
With our matters we're all alone  
And we're left by

Despite all sins pain and guns,  
Get our heart and eyes open wild

So peel off our complexes,  
Let the beast exorcised

When...  
After livin'in a fog  
Withdrawn into ourselves  
We don't break those walls at all  
Livin' deaf, dumb, blind  
We're makin' our own ghosts  
By we can't change (the) past  
With our matters we're all alone  
And we can't hide

Despite all the things said and done,  
Get our heart and eyes opened up  
So take care of our soul's garden,  
To become purified
