Depending on the jurisdiction of particular...  
With the first one scary sun goes you can't stay low  
Giving our bags don't come bag you will be no...  
The dinner I am from no hustle I win... that's my  
philosophy...  
Long time... do the... the last one is about to... secret  
best kept  
... try to bubble... no sleep till the devils  
Things ain't change we are singing to a street level  
No street to the devils  
Number one... never trust a soul money and power  
They sell their soul everybody gangster till they get  
caught by the border line

I am a G... still fuck with.  
.. no beef in am hustler... ask for something smart  
Fuck it kind of hard...  
Things ain't change we are singing to a street level  
No street to the devils  
Things ain't change we are singing to a street level  
No street to the devils  
Things ain't change we are singing to a street level  
No street to the devils  
Things ain't change we are singing to a street level  
No street to the devils
