So when I'm having a bad day
And everything you say is annoying
Nothing is going my way
And I wish that you'd just stop talking
Cause I can't breathe with you down my throat
And I can't think if I can't breathe
You gotta turn it around

Hey now, I'm gonna show today what I am made of
Hey now, I'm gonna show today what I am made of

I was late for the bus again
Reading through the texts that I couldn't send
Searching for the words that I should have said to you
But my words are like roads on a map I can't read
And I take the wrong path that I think that I need
Stumbling through words to say the right thing
I was wrong
But I can't breathe with you down my throat
And I can't think if I can't breathe
You gotta turn it around

Hey now, I'm gonna show today what I am made of
Hey now, I'm gonna show today what I am made of
Hey now, I'm gonna show today what I am made of
Hey now, I'm gonna show today what I am made of

I was late for the bus again
I'm always late for everything
And you're always there waiting for me
And do I overthink things?
Do I overthink things?

Hey now, I'm gonna show today what I am made of
Hey now, I'm gonna show today what I am made of
You gotta turn it around
You gotta turn it around
Hey now, I'm gonna show today what I am made of
Hey now, I'm gonna show today what I am made of
You gotta turn it around
