Where do I begin?
I didn't know that
I need your approval
To do something that
Would never include you
Talk is cheap
You want to know what I think?
Go back to your bedroom
With your goddamn keyboard
My future I see more
You losers should just redraw
Shooting blanks in the dark
Drop it low!

What is this fucking for?
Are you trying to justify?
You are no better than your words
Here as a waste
For the world

My dreams are higher than
The fucking sky
I'm going to keep at this
I'll do this 'til I die
You talk it, I live it
You're jealous, I admit it
You're not gonna break my stride

Do I have to bury myself
To be unnoticed?
I'll hide there until I grab you
And pull you under
I will end you!

Let me be(x2)

My dreams are higher than
The fucking sky
I'm going to keep at this
I'll do this 'til I die
You talk it, I live it
You're jealous, I admit it

You're not gonna break my stride

You say that shit to me
And I don't give a fuck
Say it to my face
I'll end you!

There's always room for change
As long as you're prepared
To pay for your mistakes
Empty your head

You keep on running
At least I got something
To end my life with
Where do you go now?
You keep on running
At least I got something
To end my life with
What do you amount to?
(X2)
