Now everything's all right  
The morning comes around  
And after all the sadness has gone  
But I need to leave you now  
Thought my will is to be with you forever

Oh, it's so hard living without you  
You made me feel alive always

Wake up my love  
Life must go on  
The sun has gone  
Announcing another day  
You're not alone  
My eternal love  
I'll take care with you  
Wherever I am  
Oh, Oh, Oh

You never be alone  
You made the choice and I agreed  
Wherever I am, wherever I am  
Everyday looking for you  
Oh, the sun has come  
The morning comes around  
Comes around, comes around  
Wherever I am
