Give me light, give me action  
at the touch of a button  
Flying through hyper-space  
I in a computer interface

Stop. Living on video.  
Stop. Integrated circuits  
Stop. Sur un faisceau de lumires.  
Stop. Is this reality

Travelling in the light beam.  
Laser rays and purple skies  
In a computer fairyland it is a dream you bring to life  
Living on video. Sur un faisceau de lumires  
I see your glittering blue eyes  
You look at me with a smile. It's a computer fantasy  
It is waiting for you and me
