More wishes than a thousand hearts can count for you
More smiles than a merry-go-round
The sweetest ending to a bed-time story told
My love follows you where you go

More laughter than a kindergarten out to play
One Sunday morning song that says it all
More summer than a California beach can hold
My love follows you where you go

Future like a promise - and you're a city of Gold
Stubborn in your bones and Jesus in your soul
Seeing you stand there - staring at the unknown
I won't pretend that it's not killing me
Watching you walk away slow

Take forgiveness - take a prayer - take the deepest
breath
Take the answers in your heart

When you wake up and the world is cruel and cold
My love follows you where you go

Future like a promise - and you're a city of Gold
Stubborn in your bones and Jesus in your soul
Seeing you stand there - staring at the unknown
I won't pretend that it's not killing me
Watching you walk away slow

More freedom than a field of flowers in the wind
More beauty than a morning after rain
Up the steepest hill - a dark and crooked road
My love follows you where you go

Future like a promise - and you're a city of Gold
Stubborn in your bones and Jesus in your soul
Seeing you stand there - staring at the unknown
I won't pretend that it's not killing me
Watching you walk away slow
