

Paul Van Dyk **"Like A Friend"**

Visit "[Like A Friend](#)" on MotoLyrics.com

There's anguish despair
And we don't feel a thing
How can I make you think?
How can I make you change lives?

Deliver new dreams
Give back a child and smile
Sending a wind of change
To free another's world

Stop turning over
It won't go away
If we don't do anything
It will always stay

But there's a way
There's a way
There's a way

Be aware of the world
And be true to your conscience
Be aware of its needs
Like a friend you can hold them

Be aware of the world
And be true to your conscience
Be aware of its needs
Have a care, have a conscience

Be aware of the world
And be true to your conscience
Be aware of the world
Like a friend you can hold them

Be aware of the world
And be true to your conscience
Be aware of its needs
Have a care, have a conscience

Be aware of the world
And be true to your conscience
Be aware of its needs

Like a friend you can hold them

There's anguish despair
And we don't feel a thing
How can I make you think?
How can I make you change?
How can I make you change?

Deliver new dreams
Give back a child and smile
Sending a wind of change
To free another
Free another, free another world

What I'm going to tell you
You don't want to hear
It's a million miles away
And a million tears
And a million tears

Be aware of the world
And be true to your conscience
Be aware of its needs
Like a friend you can hold them

Be aware of the world
And be true to your conscience
Be aware of its needs
Have a care, have a conscience

Be aware of the world
And be true to your conscience
Be aware of the world
Like a friend you can hold them

Be aware of the world
And be true to your conscience
Be aware of its needs
Have a care, have a conscience

Be aware of the world
And be true to your conscience
Be aware of its needs
Like a friend you can hold them
