He's got your number  
Knows where you're found  
But he don't know everything  
Still, he's got you down

Like christopher columbus  
In a world that's flat  
He don't know everything  
Try telling you that

Or harry houdini  
He's escaped your grasp  
That one is hold  
Try telling you that

And he's got your number  
Knows where you'll be found  
But he don't know everything  
Still, he's got you down

He's got you down, baby  
He knows you like the back of his hand

Like rudolh valinteno  
The great lover of your life  
Been awhile since you seen him, though  
I'm sure he's not with his wife

And he's got your number  
Knows where you'll be found  
But he don't know nothing  
Still, he's got you down  
And he's got your number  
And he's got you down  
He don't know nothing though  
He's got you down
