

Carry On "Check Yourself"

Visit "[Check Yourself](#)" on MotoLyrics.com

What you said - and what you did - can never come close

To the weight of the shit that's falling out of your Mouth on this day - live fast, burn out quick, what else Can I say - you're fucking with everyone's head - and You're losing my respect - that's something that I should

Expect - so tell me when did it change and was it always

This way - when will you see what a joke you made out of

Yourself - can't you contain yourself - you put up a

Front and I want to tear it down - pull your head out of The clouds - if you think you'll pull it over me - you've Got the wrong impression of who you think I am - I saw Through your disguise - you're fucking drunk this time - I want you to know - you're dead in my eyes - push your Way through the door - look me right in the eyes and You'll know - we don't want you around
