Paul Young - Bit the hand that feeds

No communication, static on the line
No one understand me when I speak my mind
I just get the feeling
That I want to let go
Surrounded by the people
I don't want to know
I think why can't we be alone
You and I in the moonlight
(you and I with the lights down low)
All the signs peak to overload
And I can't have that emotion
And I bite the hand that feeds
Hurt the heart that leads me
Trying so hard to explain
Feeling deep inside me
I got my suspicions
I could never win
'Cause every step is taking me
Down that road again
I just get the feeling
That I want to let go
Surrounded by the people
I don't want to know
I think why can't we be alone
You and I in the moonlight
(you and I with the lights down low)
All the signs peak to overload
And I can't have that emotion
And I bite the hand that feeds
Hurt the heart that leads me
Trying so hard to explain
Feeling deep inside me
Now I feel the same
Way about you
Maybe it's my jealousy
That makes me feel the way I do
