Paul Young - Then there's you

Another monday morning
Gotta clear my head
No more time for dreaming

Traffic was a nightmare
Boss is on my back
If I hear one more cross word
I think I'm gonna crack

And then there's you
Comin' in right on cue
When I say no can do
You give me strength to fight
To see a new shade of blue
Everything's black and white
And then there's you

The sky is clear this morning
Looks like a brighter day
And I don't need to worry
When it fades away

'Cos then there's you
Someone to hold on to
When all of my plans fall through
You give me strength to fight
To see a new shade of blue
Everything's black and white
And then there's you

You, keep me warm when nights are cold
You, light a fire in my soul

You give me strength to fight
To see a new shade of blue
Everything's black and white
And then there's you
