"Freeze And Explode"

Visit "[Freeze And Explode](#)" on MotoLyrics.com

There's nothing we can say or do
The damage is in front of you
I'm sorry but sometimes things fall apart
Take some time to understand
The situation's out of hand
But you didn't see it from the start
So ask me questions
Try to pull the band-aid slow
I want you to feel this right before I go
So ask me questions
Try to pull the band-aid slow
I want you to feel this right before I go

I wish we all could freeze and explode
Wish we all could freeze and explode
Wish we all could freeze and explode
Wish we all could freeze and go home
(x2)

I'm getting tired of being lost
It's time I control
As my crew flies like astronauts
I watch as we get old
We'll meet again some other day
I hope you'll finally see
That the hardest thing I've ever done
Is say goodbye to me

And I'll dream that you're not left alone
And I'll dream that you're not left alone
And I'll dream that you're not left alone
And I'll dream that you're not left alone

I wish we all could freeze and explode
Wish we all could freeze and explode
Wish we all could freeze and explode
Wish we all could freeze and go home
(x2)
