

Casual Dots "She's The Real Thing"

Visit "[She's The Real Thing](#)" on MotoLyrics.com

She's the real thing and you knew it all along
Her eyes are made of crystalline
Her hair she wears a song
She's never wrong

Seems to me you made your mind up anyway
She's only here for a day
Don't get carried away

Dissolving into mere conjecture
All that is left are these reflections
Pick yourself up off the floor
This illusion you'll be sighing more

He's the real thing and you knew it all along
His mind is quick and agile
And his heart is very strong
He's never wrong

Seems to me you made your mind up anyway
You're tired of being the one who never stays
For more than a day

Dissolving into mere conjecture
All that is left are these reflections
Some day the story will unfold
Just the way you want it to be told
