I don't give a shit about the seals  
Why deny the eskimo a meal?  
I just don't care about the whales  
Who cares if the ecosystem fails?  
I neither believe in global warming  
Nor in ecological farming  
I don't give a fuck about recycling  
I don't give a fuck about anything

We are the crown of creation  
We may do whatever we please

I kinda like PVC  
I think it's ok with CFCs  
There is a lot of money in manufacturing dioxin  
I season my food with PCB  
Nothing has so far happened to me  
I test everything on animals  
I always use aerosols

Species come and species go  
It's been like that for eons, you know  
And it's all the same to me  
It's all the fucking same to me

Fuck nature, man rules
