"Voices"

Visit "[Voices](#)" on MotoLyrics.com

We're the voices
This is who we are
We're the voices
This is who we are
We are not a scene but come bearing
Songs of freedom like Marley to the masses
We are all diseased and tearing
We see the people dying daily and it grabs us
We are not all clean but come wearing
Fronts and facades that raise the odds of you
You and I serving other gods
Which leads to destruction, selah
We are all obsessed with comparing one another to
each other and it scares us
One at a time we need to find our identity
Too many times we see the fog in the clarity
Can you hear me loud and clear
chorus: Aw, this is who we are
We're the voices of the generation
We make choices that mold a nation
Puttin' down all frustration
And sing it loud and clear
On every station
We are the voices
We are the voices
Voices aren't scared to sit in a chair and share
anywhere what the heart can't compare
We need to learn to dare to bear
Burdens of another a voice that has a choice to care
We need the voice to sing our remedy
You and I, we're like the sounds of a symphony
What's my identity, who am I
Just a kid who seeks love from the Most High
Can you hear me loud and clear
Aw, CHORUS
We all need a reformation (we are the voices)
We the people serve salvation
From the Voice that shatters land (we are the voices)
Your voice is in demand
Way oooo way, way oohh ooh (4x)
We're the voices
Sing it loud and clear

We're the voices
This is who we are
We're the voices
Sing it loud and clear
We're the voices
This is who we are
Can you hear me loud and clear
CHORUS
We all need a reformation (we are the voices)
We the people serve salvation
From the Voice that shatters land (we are the voices)
Your voice is in demand
You'll never shut us up, you'll never shut us up
You'll never shut us down
You'll never shut us up
You'll never shut us up
You'll never shut us down (we are the voices), you'll
never shut us up
You'll never shut us down, you'll never shut us up
You'll never shut us down (we are the voices)
You'll never shut us up, you'll never shut us down
You'll never shut us up
