Stay

Where have you been
My long lost friend
It's good to see you again
Come and sit for a while
I've missed your smile
Today the past is goodbye

Time can't erase
A lover's embrace
Can't you hear it calling
A new day dawning
You were longing to find

Love's taken you far away from my heart
And I've been here all alone
Have your eyes failed to find
What took you from mine
A vision that's faded in time

But you sailed away
On a fine summer's day
Don't you hear it calling?
A new day dawning
You were longing to find

There is a way to make you stay
Darlin' don't turn away
Don't doubt your heart
Can keep us apart
I'm right where you are
Stay

There is a way to make you stay
Darlin' don't turn away
Don't doubt your heart
Can keep us apart
I'm right where you are
Stay
