

## **Caverns "Motion"**

Visit "[Motion](#)" on MotoLyrics.com

I need a doctor, I need a nurse.  
To reconnect these wires, to reconnect me, with the  
world.  
I've shut it out for too long now,  
I'm beginning to forget how, to live, to care, for  
everything around me.  
I no longer recognize my own reflection, shatter mirror  
or fractured soul?  
They told me from the start, that this would be the end,  
With no one to forgive, there is no hope, no light.  
Just the uncertain thought, that this will be noticed.  
Tear down these walls.  
I need an exit, or just a way, to let the light in.
