Misery overwhelming me, feelings are long gone
My only company is this shotgun, my only excitement is
it's sound
I'm a strong person, all the others are weak, all the
others must die
I'm proud of myself, I'm proud for what I'm ready to do
I take the gun and start shooting randomly, blood and
pieces of flesh are now
Everywhere
Voice of panic is in the air, at last we taught these weak
humans fear
I'm hunting my victims, I corner them and I am pulling
the trigger
Their faces have been deformed, their limbs are
missing and I finally feel
Complete
I am proud to be a mass murderer
No-one has this power, only I can do this
My victims now are up to twenty and I know that my
mission is not over
After all this massacring, my shooting has improved,
my aim is better, I go for
The head
I really enjoy the sound of a smashed cranium, the
brains as they are slipping
Out from the head
The sound of the exploding flesh, I decapitate one
victim and I rise with it's
Head
I'm proud to be a mass murderer
I feel my end is coming near as I am surrounded by the
police pointing at me
With their guns, but I still know
I'll be remembered for my work and I won't fall on my
knees for no human law
My only friend, my gun can only take my life, I need
only one bullet in my head
I'm really proud to be a mass murderer
