Every promise every memory ... all the tears that i've cried  
Every loving word u said to me ...all was just a lie  
Every single word that i believed ... every look in your eyes  
Every time u said you'll never leave ... all just mean goodbye

Refren:

Caught in the presence of your lies in the loneliness inside  
You made me feel it  
caught in the presence of your lies in the emptyness inside  
You made me feel it  
Caught in the presence of your lies in the loneliness inside  
You made me feel it  
Caught in the presence of your lies in the emptyness inside  
Lied on my knees

Love has left me broken on my knees ... crying out in the rain  
Only you forever lost in dreams ... calling out your name  
Every promise every memory ... all the tears that i've cried  
Every time you said you'll never leave ... all just mean goodbye

Refren:

Caught in the presence of your lies in the loneliness inside  
You made me feel it  
Caught in the presence of your lies in the emptyness inside  
You made me feel it  
Caught in the presence of your lies in the loneliness inside  
You made me feel it  
Caught in the presence of your lies in the emptyness inside  
You made me feel it

Feeling empty feeling lonely feeling cold as ice  
In this cooling tears are rolling
