(The 16 seconds that make it)

Escapin the situation,
im outta the trap zone, (trap zone)
the ringers turned off on my, cellular phone (cellular
phne)
the interm wants to be...detector, hold up, the silver
money fold up, black and the cold is commin by me

you got to get away, you got to get away
you got to get away, because were here to stay

my gettaway is the boat(boat)
P.O.39 by the westside(holla)
my skin is on point (on point)
im more easy to rob,
police on my trail, i gotta slide away like that express
mail (mail, mail)

you got to get away, you got to get away
you got to get away, because were here to stay
you got to get away, you got to get away
you got to get away, because were here to stay

my imagination surprise you,
like the new york city subway,
third rail, one half is missing, three third fail
cant track down, by the phone, what if we lie by email

we get our-men..the bac-ck allys in, that look familiar
inna highschool, baby, we gotta get away
we get up on us too, silent screams in red and blue,
lonely streetlights that dont love my name, looks
familiar, we get our way, baby

you got to get away, you got to get away
you got to get away, because were here to stay
you got to get away, you got to get away
you got to get away, because were here to stay
