I used to think that I was strange
Cause people said I had to change
I sorted out the stupid hocus pocus
In this town of superstars
You have to look like you're from Mars
For anyone to stop and even notice
Oh what words do you use
To tell the tale the way you choose
I guess I've changed and didn't even know it

Because home to me is where the music plays
Home to me is livin, livin on a stage
Home to me is where the music plays

The answer to the question
Doesn't matter anymore to you or me
I'll bet you think you got me covered
I see all the superstars
With drivers drivin fancy cars
We're all waitin round to be discovered
The only time we're ever paid
Is when we hear our music played
Sometimes our audience is like a lover

Because home to me is where the music plays
Home to me is livin, livin on a stage
Home to me is where the music plays
