I wake up each day  
I wanna sleep that day away  
I catch a train  
In the rush hour rain  
Some people are talkin' to me  
I don't care what they say  
Cos I know  
Love doesn't live here now you've gone away  
Love doesn't live here but I'm left to stay  
And I thought it was me and you who gave it all  
Yes, I thought it was me and you who couldn't fall  
But it's all over now  
Over now  
Friends on the phone  
Life is good, life goes on  
But I spend my days  
In a heart broken haze  
Of movies and lonely tunes  
Every song seems to be about you

Oh oh  
Love doesn't live here since you went away  
Love doesn't live here but I'm left to stay  
And I thought you and me we were the chosen ones  
Yes I thought you and me sailed into the sun  
But it's gone, it's over now  
Do you ever think about it?  
Do you want to talk about it with me?  
Love doesn't live here since you went away  
Love doesn't live here but I'm left to stay  
And I thought it was me and you who had it all  
Yes I thought it was me and you who stood so tall  
But it's all over now  
Yes it's all over now  
Over now
