Was it love or just something that reminded me of  
Something that felt a lot like, but wasn't love?  
Just friends, friends then until the end  
You know I still pretend, just friends

Take a step and come out of the shade  
I can tell you're no longer afraid  
I'm helpless without your warming smile

Take a step and come out in the sun  
I can tell it's already begun  
I'm helpless without your warming smile

Was it love? I think it was but I'm far from sure  
I'd never felt that way before, was it love?  
Just friends, am I a fool to be asking for  
A fool to wish that we could be more than friends?

Take a step and come out of the shade  
I can tell you're no longer afraid  
I'm helpless without your warming smile

Take a step and come out here in the sun  
I can tell it's already begun  
I'm helpless without you, helpless without you  
Helpless without your warming smile  
Your warming smile
