Who were you when I woke up  
With a bad dream on my head  
How you said that made no sense  
And you showed me how it was

All the world broken for me

I could say that I was less  
When I never knew your face  
How you say I make no sense  
Can you show me how to live?

All the world open to you  
Stretched out so far I never knew  
I flashed my light into your car  
Kiss me, dimmest star

Don't ever leave  
Don't ever leave  
Don't ever leave  
Until I make up my mind  
Don't ever leave my troubled life

All the world open to you  
Stretched out so far I never knew  
I flashed my light into your car  
Kiss me dimmest star

Don't ever leave...
