Yes, it's a good day for singing a song
And it's a good day for moving alone
Yes, it's a good day, how can anything go wrong?
Good day from morning till night

'Cause it's a good day for shining your shoes
Yes, it's a good day for losing your blues
Everything to gain, nothing to lose
'Cause it's a good day from morning till night

I said to the sun
"Good morning sun, rise and shine today"
You know you gotta get going if you're gonna make a
showing
And you gotta get the right away

'Cause it's a good day for paying your bills
And it's a good day for curing your ills
So take a deep breath and throw away your pills
'Cause it's a good day from morning till night

When I woke up this morning, I was feeling all wrong
Couldn't find any reason for a happy song
Then I combed my hair and I washed my face
And my little world fell into place

'Cause it's a good day for paying your bills
And it's a good day for curing your ills
So take a deep breath, throw away your pills
'Cause it's a good day from morning till
Good day from morning till, good day from morning till
night
