

Pestilence

"Sinister"

The dark, the sinister
Creating fear in the hearts, of the feeble
To tear your soul, apart, apart

Molecular negativity
Frying your nerve cells
Where the sinister dwells

The ignorance is the feeder
Of the masses to remain

Molecular negativity

Frying your nerve cells
Where the sinister dwells

Sinister

Cold as the eternal winter
These motherfuckers claim

Molecular negativity
Frying your nerve cells
Where the sinister dwells

Sinister
