I'm inside you
It's my time
It's time for you to go away
I'm inside you

Israfel:

"Gabriel please help me, please"

Gabriel:

"I cannot help you now, you have chosen the dark path"

Djinn:

Why do I see things wrong with everything?
There is no hope or chance for changing
I need to stay clear from the animals
Swine that fill city streets with sharpened teeth
Pleasing their appetites like parasites
Lost with the soulless people I don't want to be

Break - Break down the walls of Babylon
Now - Clean out this lawless malodor
No use for clarity in an age of insanity
I need to end all things unclean

How has this come to pass? I ask myself
Why is my heart so heavy?
Why don't I learn the first time?
They keep us running in circles
And I missed the meaning of the message
Now I am filled with hate for all and everyone

Break - Break down the walls of Babylon
Now - Clean out this lawless malodor
No use for clarity in an age of insanity
I need to end all things unclean

I missed the meaning of the message
Am I the savior of nothing?
What was a vision of beauty has faltered

I can't believe this destruction
Show me the lives you intend to save
Follow my knife
Follow my light
Know that for you I will lay down my life
Know truth.

Witan:

"My people, we are plagued by a new wave of vermin.
And emerging evil who claim to be good
They also claim to be of the people for the people of
The Empire Of Light
They are nothing more than your common criminals
Vigilantes who are destroying the very fabric of our
Nation
As such a union has been forged with our friends of the
Eidolon Republic
This bond has brought promise of protection and
safety
For our people in a time of darkness and uncertainty
We are grateful and we pledge our undying allegiance
And now all who threaten our way of life, our freedom.
Will perish"

Break - Break down the walls of Babylon
Now - Clean out this lawless malodor
No use for clarity in an age of insanity
I need to end all things unclean.
