Sheep clones silicone titties phone sex test tube  
Babies  
Abortion birth control eat it up never full  
Overdose on cold medicine when you are feeling sick  
Opposites attract bullshit it's all the same  
Everyone judges me before they know my name  
Supermodel snobs and the anorexic bitches  
Only spread their legs for the ones with the riches

I don't give a shit what you fucking think of me  
None of you mean a goddamn thing to me  
This is the product of an absent god  
Too many people just stringing along  
Time to separate myself from the idiots  
And you can send me straight to hell

Go fuck yourself worthless asshole

Corporate fucks you're living a lie  
Other people's money trapped in your eyes  
Take a step off the edge  
That fucking tie around your neck  
Is like a leash that keeps you weak  
As you're dragged upon your knees  
Everyone wants to be perfect  
Everyone's a fucking whore for money  
Force the bullshit you believe  
Stuff your plastic messiah under a murdered tree  
I don't need a reason to be pissed off anymore  
I built myself up just to fall on the floor  
I fucked up everything but I don't fucking care anymore  
Fuck it all fuck you all  
This plastic society this backwards morality  
Everyone's an enemy everyone's my enemy
